WHAT CHANGED, AND WHY

SCREEN OR ELEMENT	THE WIREFRAME ASSUMED	THE MOCKUP SHOWS	WHAT I WILL CHANGE
Philosopher Card header	Plain azure colour block	Portrait image bleeds from right with gradient overlay	Keep — adds identity without hurting legibility
Dashboard hero	Simple dice/icon placeholder	Person-silhouette avatar signals the mystery pick better	Replaced dice with avatar + question mark
Philosopher Card — text	All body copy visible at once	Bio and ideology are long — overflow risk on small screens	Moved both sections into collapsible accordions
